About 2025 Occupational Employment and Wage Estimates

Occupational Employment and Wage Estimates are calculated from data collected in a national survey of employers. Data on occupational employment and wages are collected from employers of every size, in every state, in metropolitan and nonmetropolitan areas, in all industry sectors. These estimates are cross-industry estimates; each occupation's employment and wage estimates are calculated from data collected from employers in all industry sectors. Self-employed persons are not included in the survey or estimates. The OEWS program uses the Office of Management and Budget's Standard Occupational Classification (SOC) system to classify jobs into occupations based on their job duties. The May 2025 OEWS estimates are based on the 2018 SOC. The May 2025 estimates also use the 2022 North American Industry Classification System (NAICS) to classify business establishments into industries based on the establishment's primary activity.

For more information

Answers to frequently asked questions about the OEWS data are available at www.bls.gov/oes/oes_ques.htm.

Technical Notes, Methodology and Archived Documentation are available at https://www.bls.gov/oes/oes_doc.htm.

Changes and special procedures in the May 2025 estimates

Because of the lapse in federal appropriations from October 1 through November 12, 2025, additional collection and processing time was required for the May 2025 OEWS survey panel once appropriations resumed. The response rate for the May 2025 survey panel was within the normal range and no additional modifications to the OEWS methodology and procedures were necessary as a result of the shutdown.

NOTES:

MDES has calculated entry-level wage rates as the mean of the first third of the wage distribution and experienced-level wage rates as the mean of the upper two-thirds of the wage distribution. Data on experience level was not collected as part of the OEWS Survey, and the data contained in this report have not been validated by BLS and are not, therefore, official BLS data series (See technical note link included in this publication).

Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately.

Annual wages have been calculated by multiplying the hourly mean wage by a “year-round, full-time” hours figure of 2,080 hours.

* Estimate not released

**Wage is equal to or greater than \$115.00 per hour or \$239,200 per year.

--Wages for some occupations that do not generally work year-round, full-time, are reported either as hourly wages or annual salaries, depending on how they are typically paid.
